# Introduction

## What Is Academic Vocabulary?

Academic vocabulary, an aspect of academic language, refers to the specialized words traditionally identified from a corpus of academic texts related to a particular academic discipline. Academic vocabulary is used in both written and spoken academic discourse and is a critical component of the language of different disciplines, such as science, history, and literature. It is a requisite to engage in learning and thinking within these areas (Nagy & Townsend, 2012). There are two categories of academic words: domain-specific words associated with particular disciplines and general academic words shared by all disciplines (Baumann & Graves, 2010; Hiebert & Lubliner, 2008).

Definitions of academic vocabulary can differ, depending on the source and context in which the term is used. For the purposes of this booklet, we define academic vocabulary as key words and concepts in the Texas Essential Knowledge and Skills (TEKS) for English Language Arts and Reading (ELAR) and Mathematics that will help all students in kindergarten to grade 8

- read and understand complex content area text,
- interact and develop subject-matter literacy, and
- demonstrate knowledge and skills in a formal classroom environment.

This definition aligns closely with the Teachers of English to Speakers of Other Languages (TESOL) PreK–12 English Language Proficiency Standards (Gottlieb, Carnuccio, Ernst-Slavit, & Katz, 2006). TESOL defines academic language as language that is “used to acquire a new or deeper understanding of content related to the core curriculum areas and communicate that understanding to others; it is the language that students must use to effectively participate in the classroom environment” (p. 18).

## Why Is Academic Vocabulary Important?

The relationships between vocabulary knowledge and comprehension, as well as language proficiency and reading growth, are well established in the literature. Research has shown a strong and consistent predictive relationship between vocabulary knowledge and reading comprehension and academic achievement across grade levels (Alexander & Jetton, 2000; Binder, Cote, Lee, Bessete, & Vu, 2016; McKeown, Crosson, Moore, & Beck, 2018; Nagy, 2005; Proctor, Silverman, Haring, & Montecillo, 2012; Townsend, Filippini, Collins, & Biancarosa, 2012).

Vocabulary is key to the development of reading comprehension. This is even more important for English language learners (ELLs). Nonnative English speakers often face the challenge of learning core content with specialized vocabulary and basic English at the same time (August, McCardle, Shanahan, & Burns, 2014; Short & Fitzsimmons, 2007). These students may become fluent in conversational English relatively quickly, but it takes considerable time to develop the vocabulary needed to succeed in school. Many factors influence the rate at which academic English is learned, but research suggests that ELLs require 4 to 10 years to obtain the academic language and vocabulary of their native English-speaking peers (Collier, 1989; Fillmore & Snow, 2000; Graves, August, & Mancilla-Martinez, 2012; Hakuta, Butler, & Witt, 2000).

This vocabulary challenge must be addressed through systematic and intensive vocabulary instruction and language-rich classrooms. The development and adoption of vocabulary lists to help focus instruction on both discipline-specific vocabulary and general academic words that students may not know (Gersten et al., 2007) is an effective approach for all students. Evidence also suggests that instructional approaches effective for teaching native speakers can be used effectively with ELLs (August & Shanahan, 2006; Gersten & Baker, 2000). Teachers also can capitalize on the growing body of literature on effective vocabulary instruction for ELLs (e.g., August et al., 2014; Baker et al., 2014; Carlo et al., 2004; Crevecoeur, Coyne, & McCoach, 2014; Graves et al., 2012; Lesaux et al., 2014).

## How Were Terms Selected?

We identified the academic vocabulary in this resource from the TEKS for kindergarten to grade 2 ELAR and Mathematics. A group of educators and researchers with expertise in comprehension, vocabulary, mathematics, and instruction for ELLs developed, reviewed, and refined the lists. The lead team members selected the following types of terms.

- **Domain-specific academic vocabulary words:** These words relate to subject matter and concepts that students are expected to know in the different disciplines (e.g., *simile*, *decimal*).
- **General academic vocabulary words:** These words can be found across content areas and in multiple contexts. They can be used to acquire new knowledge and skills, discuss information, describe ideas, and develop concepts. For example, the words and phrases in the TEKS that describe how students are expected to demonstrate their knowledge are general academic words. These words often are found in the skills outlined in the TEKS student expectations (e.g., the student is expected to **clarify**, the student is expected to **summarize**). These words have the potential to build a strong language foundation, especially for ELLs (Beck, McKeown, & Kucan, 2013).

Lists were then reviewed and refined by the advisory group and ELAR and Mathematics teachers. For kindergarten to grade 2, the final ELAR list has 310 terms, and the Mathematics list has 272 terms.

By no means do we suggest that you teach all of the words included in this resource for your grade level and subject area. We did, however, design the lists to be manageable, should you wish to incorporate most or all of the terms in your instruction. For example, during a school year, a second-grade ELAR teacher could address most of the words on the list by teaching approximately eight words a week.

## How Can I Use This Booklet in Instructional Planning?

Our goal was to compile terms from the Texas curriculum in a useful format to help teachers plan effective instruction that incorporates academic vocabulary. The lists are intended as a resource and should not be considered a mandate for which words to teach. Again, by no means do we suggest that you teach all of the included words for your grade level and subject area, nor would it be prudent to teach the words in isolation, out of context.

Use your knowledge of your students and your school's curriculum to determine which words to teach. You may decide to delete or add terms. Terms are organized alphabetically in two sections—general academic terms and subject-specific terms. Use these lists in any way that helps you to better meet your students' needs.

Consider your students' knowledge of the words when deciding which words to teach. The lists include both domain-specific academic terms and general academic terms with which some students may already be familiar. Also consider the depth of knowledge you want your students to have for a given word—sometimes having some knowledge of a word will suffice. In these cases, teaching the meaning of the word through exposure and incidental learning may be sufficient. However, in other instances, a student may be required to recognize and use the word in a variety of contexts (Beck et al., 2013; Dale, 1965; Graves, 2000; Graves, 2006; Graves, August, & Mancilla-Martinez, 2012). In these cases, explicit instruction with repeated exposures to the word is more appropriate.

## STAAR and the Vocabulary Lists

The Mathematics list contains many content-specific words from the TEKS, many of which appear on the State of Texas Assessments of Academic Readiness (STAAR). For example, one grade 3 Mathematics item on a previously released STAAR directly assessed a student’s knowledge of the term *standard form* [Item: *The expanded notation of a number is shown.  $(9 \times 10,000) + (4 \times 100) + (1 \times 10)$  What is the standard form of this number?* (Mathematics STAAR, grade 3, 2018, released test)].

In the ELAR list, many of the words from the standards represent the language of instruction (i.e., domain-specific and general academic vocabulary) rather than the language found in the literature and informational text students will listen to or read in class (Nagy & Hiebert, 2010). On STAAR Reading, students will be expected to know both terminology from the standards and other vocabulary found in literature and informational texts. For example, on a sample STAAR item, students were assessed on both their knowledge of the term *main theme* and their knowledge of other academic vocabulary, such as *depending* and *patient*, which were in the answer choices [Item: *Which sentence states the main theme of the story? A. It is important to be on time when others are depending on you. B. Winning does not matter as long as you try hard. C. Working with others can be better than working on your own. D. The best ideas come to those who are patient.* (Reading STAAR, grade 3, 2018, released test)].

Many words on the ELAR list represent the language of instruction (e.g., *first-person*, *central idea*). Students will encounter other academic vocabulary in the literary and informational text they read in class. Because we cannot predict which words students will encounter in the text they read in class, we cannot include such words in this resource. However, it is imperative that ELAR teachers also address vocabulary found in the classroom literature.

## How Do I Teach Academic Vocabulary?

This booklet is not intended to provide in-depth information on how to develop and teach vocabulary. However, it is important to understand the distinction between breadth and depth of vocabulary knowledge, as this understanding can help you understand how to organize and plan your vocabulary instruction. **Breadth** refers to the number of words a person knows. **Depth** refers to how much a person knows about a word. Both aspects are important for word reading and comprehension. When students develop a deep understanding of a word, they are more likely to understand it when they read or hear it, and they are also more likely to use it in their speech or writing. Vocabulary instruction should focus on both depth and breadth of word knowledge. Following is a set of evidence-based guidelines to help you develop depth and breadth of academic vocabulary.

### Develop Depth of Vocabulary Through Direct Word Instruction

- **Teach specific vocabulary words directly.** There is not one “best” approach to directly teaching academic vocabulary. The method chosen should reflect how extensively you want your students to understand the vocabulary selected (August, Artzi, Barr, & Francis, 2018; Beck et al., 2013; Gallagher, Barber, Beck, & Buehl, 2019; Graves, 2000; Lesaux, Kieffer, Kelley, & Harris, 2014). Use student-friendly definitions, examples and nonexamples, visuals, and graphics to clearly transmit the meaning of a word (Marzano & Pickering, 2005). Using visuals and graphics is especially helpful for mathematical concepts that are difficult to explain verbally but are well suited to nonverbal explanations.
- **Teach relationships among words.** Help students build mental connections among words to store meanings more efficiently. These connections can help students retrieve word meanings more easily. Teach students knowledge of morphological word families and use graphic organizers, feature analyses, and word-categorizing activities (Binder, Cote, Lee, Bessette, & Vu, 2016; Neuman & Wright, 2014).
- **Teach word-learning strategies.** Teaching students how to use word parts and context to determine the meaning of unknown words has been shown to benefit vocabulary learning (e.g., Baumann, Font, Edwards, & Boland, 2005; Baumann et al., 2002; Crosson, McKeown, Moore, & Ye, 2019; Deacon, Kieffer, & Laroche, 2014; Levesque, Kieffer, & Deacon, 2019). Many of the words in this resource lend themselves to word study activities such as teaching common roots, prefixes, and suffixes. Teaching students these word foundations can go a long way toward helping students understand related vocabulary words (Crosson & McKeown, 2016; Crosson & Moore, 2017; Ebbers, 2011).

## Develop Breadth of Vocabulary by Creating a Language-Rich Environment

Direct vocabulary instruction is important, but it is insufficient and inefficient alone to foster students' language and vocabulary development. Provide multiple opportunities for students to practice using language in discussions and writing. Ensure that students read often from a variety of text types, heighten students' awareness of the language in the world around them, and develop the skills of students to learn new vocabulary on their own (Graves, 2000, 2006; Graves et al., 2012; Nagy & Townsend, 2012). Suggestions include the following.

- **Model and practice word consciousness.** Help students learn that knowing words can help them think and speak more deeply and precisely. Create an atmosphere in which trying out new words is encouraged and not knowing a word is accepted. If students are aware of the vocabulary around them and actively engage in using new words and seeing the relationships among words, students will take ownership of their language learning. Engaging in word consciousness is especially important for ELLs, as they will realize that they are not alone in the process of learning English (Graves, 2006; Stahl & Nagy, 2006).
- **Help ELLs capitalize on their knowledge of their first language.** Part of practicing word consciousness involves helping ELLs become aware of Spanish-English cognates. Using cognates, when appropriate, as part of your vocabulary instruction can provide a springboard for developing students' second language (August et al., 2018; August, Artzi, & Barr, 2016; August & Shanahan, 2006; Hiebert & Kamil, 2005; Ramirez, Chen, & Pasquarella, 2013). Each list in this resource has a Cognate/Translation column to help you learn and use cognates in your instruction.
- **Focus on important content area words and general academic words that may be unfamiliar to students** (Townsend, 2015). In addition to subject-specific vocabulary, we have included general academic words, such as *persuade* and *evidence*. Be sure to use these general academic vocabulary terms in your instruction and academic discussions with students.
- **Embed definitions in read-alouds and discussions.** When you say or read a word that students may not understand, provide quick definitions or synonyms or act out the word without interfering with the flow of the text or discussion (August et al., 2018; August et al., 2016; Giroir, Grimaldo, Vaughn, & Roberts, 2015).
- **Use academic language effectively and support students' active use of words in academic discussions.** Model the use of newly learned words across contexts and use more advanced syntax with connectives that link ideas together. This modeling helps students see how academic vocabulary words are used

in real life. To scaffold their use of these words, provide sentence and question stems that can help students build their own sentences. Allow students to work in pairs and collaborative groups to put their language into practice (Crosson & Lesaux, 2013; Dickinson & Porche, 2011; Gámez & Lesaux, 2015; Graves, 2006; Neuman & Roskos, 2012; Stahl & Nagy, 2006).

- **Encourage wide reading.** Research shows that students who read more demonstrate greater vocabulary knowledge than students who read less. There are simply too many words to teach all unknown words through direct instruction (Nagy & Anderson, 1984). Incidental learning and exposure to new words increase when students have many opportunities to read a variety of texts (Beck & McKeown, 1991; Graves, 2000; Hiebert & Kamil, 2005; Joshi, 2005; Neuman & Wright, 2014).

Support students' vocabulary development by engaging them in discussions, providing opportunities to read a wide variety of texts, and increasing their awareness of language in the world around them. Students must talk, write, and read often to expand their language proficiency and vocabulary knowledge.

## Sample Vocabulary-Building Strategies

The following vocabulary-building strategies can be easily adapted for use with either English language arts or mathematics vocabulary. The words selected are for illustration purposes. The strategies are designed so that other words can be easily substituted. The strategies are also designed to be applicable to instruction in kindergarten to grade 8. For younger students, teachers may need to simplify the graphic organizers and spend more time modeling how to think about academic vocabulary in these new ways.

### Word Scaling

This activity requires students to organize related words and helps students become aware of the relationships among words. Word scaling works best when students work together in mixed-ability small groups or pairs. As they organize the words, students practice using the words. In addition, students engage in meaningful discussions about the words and explain the meanings to one another.

#### STEPS

1. Select a group of words that are related or belong to the same category (e.g., shapes, measurements, types of numbers, antonyms, related adjectives).
2. Write the words on cards. Make a set of cards for each group or pair of students.
3. Ask students to arrange the cards in a particular order (e.g., smallest to largest, size, degrees).

#### SAMPLE: MATHEMATICS

When studying the vocabulary term *shapes*:

1. Give each group of students a set of cards with the words *circle*, *square*, *triangle*, and *rectangle*.
2. Ask students to sort the words by the number of sides: no sides, three sides, and four sides.
3. Ask students to place the cards in order from the least number of sides to the greatest number of sides.

#### SAMPLE: ELAR

When studying adjectives to describe size:

1. Give each group of students a set of cards with the words *large*, *tiny*, *small*, *gigantic*, *average*, and *enormous*.
2. Ask students to place the cards in order from smallest to largest.

## Semantic Feature Analysis

Semantic feature analysis is a strategy that can be used to organize new concepts and related vocabulary visually. Semantic feature analysis illustrates the hierarchical relationships in a chart or grid. In the lower grades, it is imperative for teachers to model how to think through simple semantic feature analysis grids many times before asking students to engage in this activity independently.

### STEPS

1. Identify the target concept for the chart to teach. The selected concept should be the most inclusive. In other words, it should encompass all the ideas or members of the categories used in the analysis.
2. In the left column, list the most concrete ideas or members of categories associated with the target concept.
3. Identify the features of words associated with the target concept. List these across the top row of the grid.

### SAMPLE: MATHEMATICS

Shapes

	Three sides	Four sides	Curved lines	All sides always equal
rectangle	–	+	–	–
square	–	+	–	+
triangle	+	–	–	–
circle	–	–	+	–

### SAMPLE: ELAR

Types of nonfiction

	Gives information about something	Tells how to do something	Tells the story of a person's life
all about	+	–	–
how-to	+	+	–
biography	–	–	+

## Rating Word Knowledge

Rating word knowledge uses a graphic organizer, adapted from the work of Blachowicz and Fisher (2009), to prompt students to think and talk about the vocabulary words they will learn.

### STEPS

1. Determine the vocabulary words to be taught.
2. Write the words on the board.
3. Read each word as you point to it.
4. Ask students to write the words in the left column.
5. Ask students to rate their knowledge of the meaning of the word by writing the following:
  - 1—if they have never heard or seen the word before
  - 2—if they have heard or seen the word but do not know what it means
  - 3—if they have a general understanding of the word but cannot explain its meaning to others or use it in a sentence
  - 4—if they know the word well enough to explain it to others

Rating word knowledge promotes metacognitive skills as students monitor their understanding of words and helps students focus on the important vocabulary words in a chapter or unit.

Rating word knowledge can also be used after instruction to determine whether students' knowledge has changed. It can provide teachers with information about students who may need additional practice and instruction.

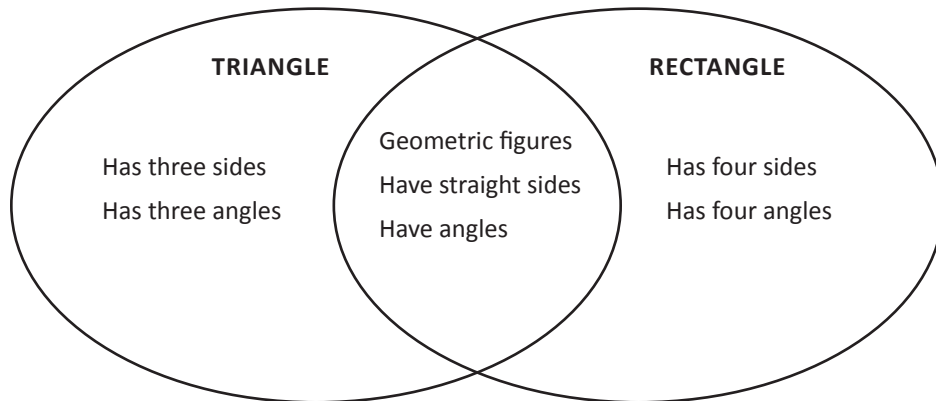

## Venn Diagram

This activity (Nagy, 1988) can be used to compare and contrast two related vocabulary words.

### SAMPLE: ELAR

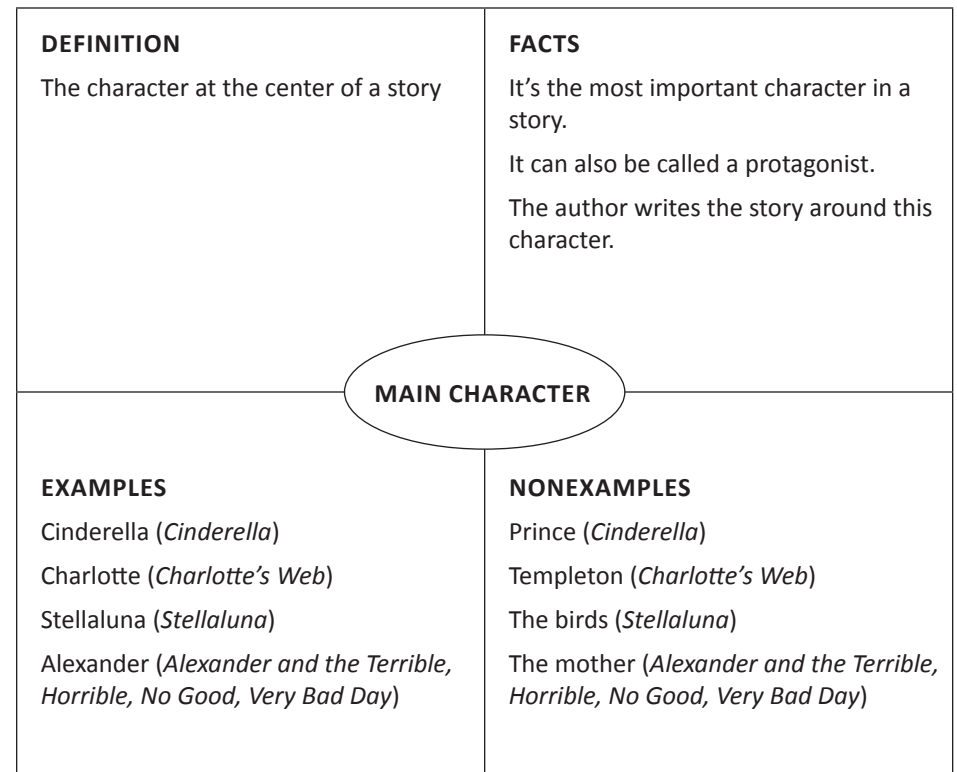

### SAMPLE: MATHEMATICS

## Frayer Model

The Frayer model (Fray, Frederick, & Klausmeier, 1969) is a graphic organizer that helps students think about the relationships and categories associated with the vocabulary being taught. Students use examples to explain and elaborate their understanding of a concept or word. The vocabulary word is entered into the central circle, and supporting examples, nonexamples, and other information are written in the boxes.

### SAMPLE: ELAR

The labels for the boxes may be changed to better fit the characteristics of the concept being learned. In the mathematics Frayer model below, Definition and Facts have been changed to Characteristics and Noncharacteristics.

**SAMPLE: MATHEMATICS**

<p><b>CHARACTERISTICS</b></p> <p>Drawings with a few words</p> <p>Show information with lines, shapes, and colors</p> <p>Can be used to compare things or numbers</p> <p>Easier to understand than only words or numbers</p>	<p><b>NONCHARACTERISTICS</b></p> <p>Only words</p> <p>Only numbers</p> <p>Written story</p> <p>Difficult to understand</p>
<p><b>GRAPH</b></p>	
<p><b>EXAMPLES</b></p> <p>Bar graph</p> <p>Circle graph or pie chart</p> <p>Picture graph or pictograph</p> <p>Tally chart</p>	<p><b>NONEXAMPLES</b></p> <p>Paragraph</p> <p>Story</p> <p>Drawing</p>

**Four Squares**

Four squares (Schwartz & Raphael, 1985; Stahl & Nagy, 2006) is an activity used to teach vocabulary words and the concepts they represent. Working in pairs, students discuss and complete each of the squares.

**SAMPLE: ELAR**

<p><b>WORD</b></p> <p>Poetry</p>	<p><b>EXAMPLE</b></p> <p>My neighbor’s dog is purple          Its eyes are large and green          Its tail is almost endless,          The longest I have seen...          My neighbor’s dog is nasty          It has a wicked smile          Before my neighbor painted it,          It was a crocodile!</p> <p style="text-align: right;">by Jack Prelutsky</p>
<p><b>DEFINITION</b></p> <p>Pieces of writing often having figurative language and lines that have rhythm and sometimes rhyme</p>	<p><b>NONEXAMPLE</b></p> <p>“That summer, they dug up the big field, and poured the foundation, and set brick on top of brick until they’d built a school. A sign above the door read, Frederick Douglass Elementary. ‘That’s a good name for me,’ thought the school.”</p> <p style="text-align: right;"><i>School’s First Day of School</i> by Adam Rex</p>

**SAMPLE: MATHEMATICS**

<p><b>TERM</b></p> <p>expanded form</p>	<p><b>EXAMPLES</b></p> <p><math>293 = 200 + 90 + 3</math>  <math>358 = 300 + 50 + 8</math></p>
<p><b>DEFINITION</b></p> <p>A way of writing numbers to see the math value of each digit</p>	<p><b>NONEXAMPLES</b></p> <p>420          1,567  <math>1/2</math></p>

## Cognate Connection

When ELLs in a classroom all speak Spanish as their first language, teachers can use activities that prompt ELLs to make connections to their native language.

English	Spanish
ELAR	
verb	verbo
fiction	ficción
central idea	idea central
dictionary	diccionario
MATH	
triangle	triángulo
circle	círculo
cone	cono
symbol	símbolo

## Sample Word Lists

When focusing on general academic vocabulary, it may be helpful to consult lists of the most common words in the English language. Below are a few such lists. Keep in mind that many of the terms in this booklet are specialized, content-specific vocabulary and may not appear on the lists of “most frequent” words.

### Academic Word List

Averil Coxhead (2000) compiled the Academic Word List—the 570 most frequently used word families in a corpus of academic texts. The list focuses on academic words and thus excludes the most common 2,000 words. It is organized into 10 sublists in order from the most to least frequently used word families. The lists can be found on Coxhead’s website: [www.victoria.ac.nz/lals/resources/academicwordlist](http://www.victoria.ac.nz/lals/resources/academicwordlist)

### Word Zones

Published as part of Dr. Freddy Hiebert’s Text Project, *WordZones for 4,000 Simple Word Families* (2012) includes 5,586 of the most frequently used words, sorted into word families and grouped into four zones of approximately 300, 500, 1,000, and 2,000 words. Download the list for free at:

[www.textproject.org/archive/resources/wordzones-for-4000-simple-word-families](http://www.textproject.org/archive/resources/wordzones-for-4000-simple-word-families)

### Others

## How Do I Decide Which Words to Teach?

Selecting words to teach is an important component of vocabulary instruction planning. Consider the key guidelines developed by Beck et al. (2013) and Nagy and Hiebert (2010) listed below; we encourage you to explore these publications to find examples and additional explanations.

- **For in-depth instruction, select words that are important for understanding the “big ideas” in the lesson** (e.g., overarching concepts in mathematics). Focus on words that are both important and useful. By selecting words that students will frequently use and read, you help build a strong vocabulary foundation.
- **Select words that are domain specific and critical to understanding the topic, even if those words are not particularly useful** (e.g., *polygon*).
- **Also select words that may not be critical to comprehending a particular text but are commonly encountered across content areas.** For example, words like *organizing* and *process* are used across many content areas but are often not the focus of instruction because they are not central to a text or a specific content area. Teaching such words can greatly benefit ELLs’ vocabulary development.

Instructional time is valuable. Time allocated to in-depth vocabulary instruction should focus on the most useful words to students as they read, write, and discuss across the content areas.

## Notes About the Word Lists

- Words are organized into two categories—general academic and subject specific.
- We included only words from the standards themselves (i.e., the knowledge and skills statements). We did not list words used in the introductions of each grade level.
- For each word listed, we provided where the kindergarten, grade 1, and/or grade 2 standards can be found in the TEKS.
- The word is provided as it appears in the standards. If an inflectional ending is added to a word in the standards, it is included in the list (e.g., *apply(ing)*).
- For each word, we provided the part of speech, a Spanish cognate or translation, and a definition based on the word’s use in the standards. If a word has multiple meanings in the standards, we provided them.
- Spanish cognates are in bold, and translations are not.

# Cheat Sheets

## Elementary and Middle School ELAR TEKS

	Kindergarten	Grades 1–5	Grades 6–8
1	Oral language (e.g., listen, work collaboratively, communicate socially)		
2	Beginning reading and writing (e.g., phonological awareness, phonetic knowledge, spelling knowledge, handwriting)		Vocabulary
3	Vocabulary		Fluency
4	Self-sustained reading	Fluency	Self-sustained reading
5	Comprehension skills	Self-sustained reading	Comprehension skills
6	Response skills	Comprehension skills	Response skills
7	Multiple genres: Literary elements	Response skills	Multiple genres: Literary elements
8	Multiple genres: Genres	Multiple genres: Literary elements	Multiple genres: Genres
9	Author’s purpose and craft	Multiple genres: Genres	Author’s purpose and craft
10	Composition: Writing process	Author’s purpose and craft	Composition: Writing process
11	Composition: Genres	Composition: Writing process	Composition: Genres
12	Inquiry and research	Composition: Genres	Inquiry and research
13		Inquiry and research	

## Elementary Math TEKS

	K – Grade 1	Grade 2	Grade 3	Grade 4	Grade 5
1	Mathematical process standards				
2	Number and operations				
3	Number and operations				
4	Number and operations	Number and operations	Number and operations	Number and operations	Algebraic reasoning
5	Algebraic reasoning	Number and operations	Algebraic reasoning	Algebraic reasoning	Geometry and measurement
6	Geometry and measurement	Number and operations	Geometry and measurement	Geometry and measurement	Geometry and measurement
7	Geometry and measurement	Algebraic reasoning	Geometry and measurement	Geometry and measurement	Geometry and measurement
8	Data analysis	Geometry and measurement	Data analysis	Geometry and measurement	Geometry and measurement
9	Personal financial literacy	Geometry and measurement	Personal financial literacy	Data analysis	Data analysis
10		Data analysis		Personal financial literacy	Personal financial literacy
11		Personal financial literacy			

## Middle School Math TEKS

	Grade 6	Grade 7	Grade 8
1	Mathematical process standards		
2	Number and operations		
3	Number and operations	Number and operations	Proportionality
4	Proportionality	Proportionality	Proportionality
5	Proportionality	Proportionality	Proportionality

variety	6E, 6F		4C	noun	<b>variedad</b>	a number or collection of different things
wants	9D	9B		noun	deseos	something that is desired but not necessarily needed
workplace	1A	1A	1A	noun	lugar de trabajo	the office, factory, etc. where people work

# SUBJECT SPECIFIC

Word	K Standard	G1 Standard	G2 Standard	Part of Speech	Cognate (bold)/ Translation	Definition
addends		3C		noun	sumandos	one of two numbers being added together
addition	3, 3A	3, 3E, 3F, 5D, 5F	4, 4C, 4D, 6, 7C, 10C	noun	suma/adición	the act or process of combining numbers into a single sum
algorithms			4B, 4C	noun	<b>algoritmos</b>	a set of steps that are followed in order to solve a mathematical problem
analog clock		7E	9G	noun	reloj análogo	a clock with hands and hours marked from 1 to 12 to show the time
area			9, 9F	noun	<b>área</b>	a measure of the two-dimensional space inside a closed two-dimensional figure or surface of a three-dimensional figure
bar graph(s)			10A, 10B, 10C	noun	<b>gráfica de barras</b>	a chart that uses parallel bars whose lengths are in proportion to the numbers represented
bar-type graphs		8B, 8C		noun	gráfica similares a gráficas de barras	a graph that allows comparisons between and among quantities to be made
circles	6A	6C, 6D		noun	<b>círculos</b>	a line that is curved so that its ends meet and every point on the line is the same distance from the center
compose	2I	2B, 3C, 6F	2A, 8D	verb	formar	to form a number by putting digits together
computations		3	4	noun	cálculos	the act or action of determining by use of mathematics
concrete model(s)/ object(s)	2E, 3C	2B, 3A, 5D	2A, 3C, 9A, 9F	noun	<b>modelos concretos</b>	a solid object used to display an example of an abstract concept
cones	6B	6E	8B	noun	<b>conos</b>	a shape with a circular base and sides that taper evenly to a point
cubes	6B	6E	8B	noun	<b>cubos</b>	a solid body having six equal square sides
cylinders	6B	6E	8B	noun	<b>cilindros</b>	a shape in which parallel line segments connect corresponding points on two parallel and congruent bases
data	8, 8A, 8B	8, 8A, 8B	10, 10A, 10B, 10C	noun	<b>datos</b>	facts or information used usually to calculate, analyze, or plan something
decimal point			5B	noun	<b>punto decimal</b>	the dot at the left of a decimal or between the decimal and whole parts of a mixed number
decompose(ing)	2I	2B, 3D	2A, 8E	verb	<b>descomponer</b>	to break down into simpler parts
diagram(s)	1D	1D	1D	noun	<b>diagrama</b>	a drawing that explains or shows the parts of something
dividing			8E	verb	<b>dividir</b>	to separate into two or more parts or pieces

Word	K Standard	G1 Standard	G2 Standard	Part of Speech	Cognate (bold)/ Translation	Definition
division			6, 6B	noun	<b>división</b>	the mathematical process of finding out how many times one number is contained in another
eighths			3A, 3D	noun	octavo	one of eight equal parts
equal	2E	5E, 5G	3A, 3C, 6, 9B	noun	equivalente	to be the same in number, amount, degree, rank, or quality as
equal sign		5E		noun	signo igual	a symbol used to show that two numbers are equal
equal to	2E			adjective	igual a	the same in number
equation		5F		noun	<b>ecuación</b>	a mathematical statement saying that two expressions are the same; an equal sign joins the two expressions
even			7A	adjective	par	able to be exactly divided by two
expanded		2C	2B	adjective	<b>expandida</b>	a number written to show the value of each digit
expanded form		2C	2B	noun	notación o <b>forma expandida</b>	way of writing numbers to see the math value of each digit
expression		5E		noun	<b>expresión</b>	a mathematical statement that does not have an equal sign or an inequality sign
fourths		6H	3A, 3D	noun	cuartos	one of four equal parts
fractional			3, 3B, 3C	adjective	<b>fraccionario</b>	of, relating to, or being a fraction
geometry	6, 7	6, 7	8, 9	noun	<b>geometría</b>	a branch of mathematics that deals with points, lines, angles, surfaces, and solids
geometric	6D	6A, 6D, 6E	8B, 8E	adjective	<b>geométrico</b>	of or relating to geometry
graph(s)	1D, 8B, 8C	1D, 8B, 8C	1D, 10A, 10B, 10C, 10D	noun	<b>gráficas</b>	a diagram that by means of dots and lines shows a system of relationships between things
greater than		2D	2C	adjective	<b>mayor que</b>	having a larger number or amount than another
halves		6H	3A, 3D	noun	mitades	one of two equal parts
hexagons		6C, 6D		noun	<b>hexágonos</b>	a closed geometric figure having six angles and six sides
interval(s)			10B, 10C	noun	<b>intervalos</b>	the space between each value on the scale of a graph
length(s)	7A	7, 7A, 7B, 7C, 7D	9, 9A, 9B, 9D, 9E, 10A	noun	largo	the distance from one end of something to the other end; a measurement of how long something is
less than				adjective	menor que	smaller in amount or number
linear		7A		adjective	<b>lineal</b>	made up of, relating to, or like a line
manipulatives	1C	1C	1C	noun	<b>manipulativos</b>	objects a student can use in a way that teaches or reinforces a lesson

Word	K Standard	G1 Standard	G2 Standard	Part of Speech	Cognate (bold)/ Translation	Definition
mathematical ideas	1D, 1E, 1F, 1G	1D, 1E, 1F, 1G	1D, 1E, 1F, 1G	noun	<b>idea matemática</b>	a formulated thought in relation to math concepts
mathematical language	1G	1G	1G	noun	<b>lenguaje matemático</b>	the system of mathematical words or signs that people use to express thoughts and feelings to each other
mathematical processes	1, 2, 3, 4, 5, 6, 7, 8, 9	1, 2, 3, 4, 5, 6, 7, 8, 9	1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11	noun	<b>procesos matemáticos</b>	a series of steps that lead to the production of a desired result
mathematical relationships	1F	1F	1F	noun	<b>relación matemática</b>	the way in which math concepts are connected
measuring tape(s)			9D	noun	cintas para medir	a long, thin piece of plastic, cloth, or metal that is marked with units of length (such as inches or centimeters) and that is used for measuring things
meter stick(s)			9D	noun	reglas de un metro de longitud	a measuring stick 1 meter long that is marked off in centimeters and usually millimeters
more than	2E, 2F	2B, 6F	2A	adjective	más que	greater in number
multiple		3A		noun	<b>múltiplo</b>	the number found by multiplying one number by another (e.g., multiple of 10)
multiplication			6, 6A	noun	<b>multiplicación</b>	the process of adding a number to itself a certain number of times
non-examples		6H	3D	noun	contra-ejemplos	something that is not an example
number line(s)		2F	2E, 2F, 9C	noun	<b>línea de números</b>	a line in which points are matched to numbers
number sentence(s)	3C	3E, 3F, 5D	4D	noun	enunciado numérico	math sentence written in numerals and symbols
number sense	1C	1C	1C	noun	<b>sentido numérico</b>	an understanding of numbers and number relationships, including symbolic representations such as number sentences
numerals	2H			noun	<b>numeral</b>	a symbol or group of symbols representing a number
odd			7A	adjective	impar	not capable of being divided by two without leaving a remainder
one-digit		3A		adjective	de o con un solo dígito	any of the numerals 1 to 9 and the symbol 0
operation(s)	2, 3, 4	2, 3, 4, 5, 5G	2, 3, 4, 4B, 5, 6, 7	noun	<b>operaciones</b>	the math process of addition, subtraction, multiplication, and division
orientation	6E			noun	<b>orientación</b>	position or alignment
pictograph(s)			10A, 10B, 10C	noun	<b>pictografía</b>	a diagram representing statistical data by pictorial forms
pictorial	2E, 3C	2B, 3A, 3B, 3E, 5D	2A	adjective	<b>pictórico</b>	to be shown in the form of a picture

Word	K Standard	G1 Standard	G2 Standard	Part of Speech	Cognate (bold)/ Translation	Definition
pictorial model(s)	2E, 3C	2B, 3A, 3B, 3E, 5D	2A	noun	<b>modelos pictóricos</b>	having or using pictures to represent a concept
place value		2, 2E, 2F	2, 2D, 4B, 4C, 7B	noun	valor posicional	the value of the location of a digit in a number
point(s)			2F, 5B, 10A	noun	<b>puntos</b>	a geometric element that has a position but no dimensions and is pictured as a small dot
polygons			8C	noun	<b>polígonos</b>	a flat geometric figure having three or more straight sides
rectangle(s)	6A	6C, 6D	8E, 9F	noun	<b>rectángulo</b>	a four-sided shape that is made up of two pairs of parallel lines and that has four right angles
rectangular prisms		6E	8B	noun	<b>prismas rectangulares</b>	a three-dimensional object that has six rectangular faces
rhombuses		6C, 6D		noun	<b>rombos</b>	a shape with four sides that are equal in length and with four angles that are not always right angles
rulers			9D	noun	reglas	a straight piece of plastic, wood, or metal that has marks on it to show units of length and that is used to measure things
shapes	6, 6A, 6D, 6F	6, 6A, 6B, 6D, 6F	8, 8A, 8D, 8E	noun	figuras	the form or outline of an object
shares		6G	6	noun	parte	a portion into which something is divided
skip count		5B		verb	contar de dos en dos, de tres en tres, etc.	counting forward or backward by a number other than 1
solids	6, 6B	6, 6E	8, 8B, 8D	noun	<b>sólidos</b>	something that has length, width, and thickness
spheres	6B	6E	8B	noun	<b>esferas</b>	a three-dimensional solid that is perfectly round
standard form		2C	2B	noun	<b>forma estándar</b>	a way to write numbers by using the digits 0–9, with each digit having a place value
subtract(ing)	3C	3D, 5G	4A, 4B,	verb	restar	to take a number or amount from another number or amount
subtraction	3, 3A	3, 3E, 3F, 5D, 5F	4, 4C, 4D, 6, 7C, 10C	noun	resta	the act or process of taking away one number from another
sum(s)	3B	3A	2A	noun	<b>suma</b>	the result obtained by adding numbers
symbol(s)	1D	1D, 2G, 4B	1D, 2D, 5B	noun	<b>símbolo</b>	a letter, character, or sign used instead of a word to represent a quantity, position, relationship, direction, or something to be done
system	2	2	2	noun	<b>sistema</b>	a regularly interacting or interdependent group of items forming a unified whole

Word	K Standard	G1 Standard	G2 Standard	Part of Speech	Cognate (bold)/ Translation	Definition
square(s)	6A	6C, 6D	8E, 9F	noun	cuadrados	a rectangle with all four sides equal
square unit(s)			9F	noun	unidades cuadradas	the metric unit used to measure area
target		6F		adjective	objetivo	a goal to be achieved
T-charts		8A		noun	diagrama en T	a graphic organizer used to compare and contrast ideas in a visual representation
tally marks		8A		noun	marcas de conteo	a way of keeping count by drawing marks
technique(s)	1C	1C	1C	noun	<b>técnica</b>	a way of doing something by using special knowledge or skill
technology	1C	1C	1C	noun	<b>tecnología</b>	a method of or machine for doing something that is created through technical means
terms		3B, 5F	7C	noun	términos	any one of the numbers in a series
three-dimensional	6, 6B, 6C, 6E	6, 6B, 6E	8, 8B, 8D	adjective	<b>tridimensional</b>	having all three dimensions (length, width, and height)
triangles	6A	6C, 6D	8E	noun	<b>triángulos</b>	a polygon having three sides
triangular prisms		6E	8B	noun	<b>prismas triangulares</b>	a prism with two identical, triangular bases
two-digit			4B	adjective	de o con dos dígitos	a number greater than 9
two-dimensional	6, 6A, 6C, 6D, 6F	6, 6A, 6B, 6C, 6D, 6F, 6G	8, 8A, 8D, 8E	adjective	bidimensional	having only two dimensions (length and width)
understand	2	5E	2	verb	entender	to know why or how something happens or works
unit(s)		7, 7B, 7C, 7D	3, 9, 9A, 9B, 9D, 9F	noun	<b>unidades</b>	a fixed quantity (as of length, time, or value) used as a standard of measurement
unknown(s)		3B, 5F	7C	noun	desconocido	the variable to be solved
value(s)		4, 4A, 4B, 4C, 5E	5, 5A, 5B	noun	valor	a numerical quantity that is assigned or found by calculation
vertices			8A, 8C	noun	<b>vértices</b>	a point where the adjacent sides of a polygon meet
weight	7A			noun	peso	a measure of how heavy an object is
whole		7D	3, 3B, 3C	adjective	entero	complete or full; not lacking or leaving out any part
whole number(s)	2, 2B	2, 2D, 2E, 2F, 3, 5D, 5F	2, 2C, 2D, 2E, 2F, 4, 4D, 9C	noun	números enteros	a number that is zero or any of the natural numbers
withdrawal			11C	noun	retiro	the act of taking money out of a bank account
word forms			2B	noun	forma escrita	writing the number as you would say it in words
workplace	1A	1A	1A	noun	lugar de trabajo	the office, factory, etc. where people work

Word	K Standard	G1 Standard	G2 Standard	Part of Speech	Cognate (bold)/ Translation	Definition
word problems	3B	3B, 5D	4C, 7C, 10C	noun	problemas razonados	a few sentences describing a “real-life” scenario where a problem needs to be solved by way of a mathematical calculation
yardsticks			9D	noun	reglas de una yarda de longitud	a long, flat tool that is 1 yard long and is used to measure things
